

My Flood Story

On the holidays there was a major flood. So many houses were destroyed and damaged. I feel sorry for Jamie and his family. Their house got flooded to the roof. They got stuck on their roof. My house was okay. So many signs and roads were under water. It was like the environment was crushed to pieces. It would have taken three weeks to repair one house. The mud army started helping and people from the environment started helping each other. That's how the environment was saved by the people living in Baffle Creek District.
